

I am one of the early adopters of satellite radio. XM Radio is a great service which offers me a freedom to listen to what I want when I want to. I love smooth jazz music and I used to listen to KKJZ (106.7 FM) in Portland OR but all of a sudden it changed the music format to light rock. There is no smooth jazz radio station in Portland OR and I subscribed to XM radio. XM Radio has been fantastic and I now can listen to all the smooth jazz along with 3 classic music, CNN news, singers and standards such as Frank Sinatra, etc.. With the new service of Traffic, I use it when I drive to Seattle and it's a great service. People will listen to FM and AM radio stations if they can improve service and listen to their listeners more. At the moment, I listen to XM Radio about 95% of the time and 5% of the time, I listen to local (Portland OR) FM station for some local news that I can't get from XM Radio. I love XM radio so much and their new traffic and weather service simply enhance their quality.

I strongly support XM Radio's decision to offer local traffic and weather in many cities. In fact I want XM Radio to expand the local traffic and weather to many more cities including Portland OR.

Thank you.
